DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-11 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over GB 2 307 912 A.

GB teaches a multifunctional unsaturated polyurethane (meth)acrylate oligomer floor coating compositions that are deemed to comprise poly(alkyleneoxy) groups, see abstract page 11, especially the structure of formula 3, the examples and claims such as claim 26. Applicant's claims are

Application/Control Number: 09/686,500

Art Unit: 1714

1

deemed to be anticipated over said cited sections. In the alterative, it is somewhat unclear if the said cited section directly teach (e.g. by way of an explicit example) a floor coating composition that meets all of applicant's claimed parameters. In that case, it would have bee obvious to one having ordinary skill in the art to use the board disclosure of the references as a whole as motivation to make floor coating composition that meet applicant's particularly claimed parameter. In any case, applicant has set forth no showing of any criticality for their particularly claimed coating compositions parameters that may distinguish it from those floor-coating compositions taught and suggested by the reference.

4. Claims 1-11 and 14 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Matsumoto et al. U.S. Patent Number 6,596,445.

Matsumoto et al teach O-acyloxime photoiniators that may be present in floor coating compositions as claimed by applicant, see column 31, lines 31-54 which states: "For example, the following compounds can be used singly or in combination with the other monomers as the addition-polymerizable monomer having an ethylenically unsaturated double bond used in the present invention. Specifically, they include t-butyl(meth)acrylate, ethylene glycol di(meth)acrylate, 2-hydroxypropyl (meth)acrylate, triethylene glycol di(meth)acrylate, trimethylolpropane tri(meth)acrylate, 2-ethyl-2-butylpropanediol di(meth)acrylate, pentaerythritol tri(meth)acrylate, pentaerythritol tetra(meth)acrylate, dipentaerythritol hexa(meth)acrylate, dipentaerythritol penta(meth)acrylate, polyoxyethylated trimethylolpropane tri(meth)acrylate, tris(2-(meth)acryloyloxyethyl)isocyanurate, 1,4-diisopropenyl-benzene, 1,4-dihydroxybenzene (meth)acrylate, decamethylene glycol

Application/Control Number: 09/686,500

Art Unit: 1714

di(meth)acrylate, styrene, diallyl fumarate, triallyl trimellitate, lauryl (meth)acrylate, (meth)acrylamide, and xylenebis(meth)acrylamide. Further, there can be used a reaction product of a compound having a hydroxyl group, such as 2-hydroxyethyl (meth)acrylate, 2-hydroxypropyl (meth)acrylate, and polyethylene glycol mono(meth)acrylate with diisocyanate such as hexamethylenediisocyanate, toluenediisocyanate, and xylenediisocyanate. Particularly preferred are pentaerythritol tetraacrylate, dipentaerythritol hexaacrylate, dipenta-erythritol pentaacrylate, and tris(2acyloyloxyethyl)-isocyanurate." (emphasis added) Also see column 36, lines 39-57. Applicant's claims are deemed to be anticapted over the above cited patent sections. In the alterative, it is somewhat unclear if the said cited section directly teach (e.g. by way of an explicit example) a floor coating composition that meets all of applicant's claimed parameters. In that case, it would have bee obvious to one having ordinary skill in the art to use the board disclosure of the references as a whole as motivation to make floor coating composition that meet applicant's particularly claimed parameter. In any case, applicant has set forth no showing of any criticality for their particularly claimed coating compositions parameters that may distinguish it from those floor-coating compositions taught and suggested by the reference.

5. Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2 307 912 A or Matsumoto et al. U.S. Patent Number 6,596,445; both references individually in view of JP 54041938 English language abstract or Klein et al U.S. Patent Number 6,345,835.

Application/Control Number: 09/686,500. Page 5

Art Unit: 1714

The primary references do not direct teach the further addition of applicant's claimed poly(alkyleneoxy) group containing epoxy resin.

It would have been obvious to one having ordinary skill in the art to use the disclosure of either secondary reference as motivation to add applicant's claimed poly(alkyleneoxy) group containing epoxy resin to the floor coating compositions taught by the primary references.

Prior-Art Cited But Not Applied

6. Any prior-art reference which is cited on FORM PTO-892 but not applied, is cited only to show the general state of the prior-art at the time of applicant's invention.

Examiner Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Joseph D. Anthony whose telephone number is (571) 272-1117. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on (571) 272-1119. The centralized FAX machine number is (571) 273-8300. All other papers received by FAX will be treated as Official communications and cannot be immediately handled by the Examiner.
